Personal Profile

Passionate web developer dedicated to crafting exceptional user experiences through dynamic and intuitive websites. Skilled in HTML, CSS, JavaScript, and React.js, I prioritize responsive design and performance optimization. Eager to contribute to impactful projects and continuously refine my coding and design expertise.

Professional Experience

- **Front-End Developer, Herat University, Herat, Afghanistan (2022)**
 - Developed interactive and responsive user interfaces using HTML, CSS, and JavaScript.
 - Collaborated with design teams to translate wireframes and mockups into functional web pages.
 - Implemented best practices for front-end development to ensure crossbrowser compatibility and accessibility.
 - Optimized website performance through code optimization and load time reduction.
 - Maintained and updated existing web applications, incorporating new features and addressing bugs.
 - Stayed abreast of emerging frontend technologies and trends to enhance development processes and user experiences.
- **Back-End Developer, Herat University, Herat, Afghanistan (2022)**
 - Developed and maintained server side applications and databases using a variety of technologies, including PHP, MySQL, MongoDB, and Node. Utilized front-end skills in HTML, CSS, JavaScript, Bootstrap, and React to integrate front-end components with back-end systems.
 - Contributed to the development and maintenance of university websites and internal tools, ensuring efficient data management and system functionality.

- Led the design and implementation of a RESTful API for a university platform, enabling seamless data exchange and integration with various systems.
- Implemented security measures and data protection protocols to maintain the integrity and confidentiality of sensitive information.

Education

- **Herat University, Herat, Afghanistan (Graduated 2023)**
 - Bachelor of Computer Science, Software Engineering
- **CS of CS (Creative Student of Computer Science) Certification (2022)**
- A prestigious two-year program focusing on comprehensive webdevelopment training, covering front-end and back-end technologies, responsive design, database management, and server-side programming.
- **Iqra Academy, Herat, Afghanistan (2015)**
 - Finished New Intercom system with a high degree.
 - Studied Pre-TOEFL course (4 months).

Projects

- **Employee Management System (Angular):** Developed a comprehensive system for managing employee data, including personal information, job roles, and performance evaluations.
- **Nike Web Template (React):** Created a visually appealing and user-friendly website template inspired by the Nike brand, utilizing React components for dynamic and interactive elements.
- **Employee Management System (React):** Developed a comprehensive system for managing employee data, including personal information, job roles, departments and number of users.
- **Hotel Reservation System (Spring Boot):** Built a robust system for managing hotel reservations, including room availability, booking processing, and guest management functionalities.
- **Clima App (Flutter):** Developed a mobile application using Flutter to provide real-time weather information and forecasts to users.

Volunteer Work

- **Teaching Assistant, Herat University (1 year):** Assisted professors with course instruction and provided support to students in computer science and software engineering subjects.
- **Teaching ICDL, Herat University (1 year).**
- **Teaching English, Azhar Academy (1 year).**
- **Volunteer as YABC in Red Crescent.**

Awards & Recognition

- Awarded for developing a complete web system, demonstrating proficiency in web development technologies and project management skills.
